

## **Who needs a Waste Hauler permit?**

Any individual or enterprise within the limits of Davis County who collect or salvage any material including, but not limited to, household wastes, refuse, sanitary wastes, metals, chemicals, drums, animal by-products, automotive parts, or any other waste other than from their own business or residence.

## **How do I obtain a permit?**

In order to obtain a permit you must submit a completed [Waste Hauler Permit Application](#) or [Waste Tire Permit Application](#), applicable fees, and be compliant with the Davis County Board of Health – Waste Hauler Regulation.

## **What is the fee for a Waste Hauler permit?**

Cost per vehicle for 1 full year; January-December \$75.00

- Waste Tire Permit (R315-320) 1-5 trucks \$50/truck  
additional trucks \$10 each

## **What are the requirements for the general public?**

The following are exempt from obtaining a permit:

- Removal of materials and wastes from a private residence by volunteer citizens in times of disaster or under physical, financial or economic conditions to aid the resident in maintaining a safe, healthful environment.
- Removal of yard waste by a person.
- A person who only transports construction and demolition waste that is generated as a result from the operation of their business.

## **What can Waste Haulers haul?**

Collection and transport vehicles may haul sewage, septic tank contents, blood, bones, offal, used animal fat, dead animals, animal and vegetable matter resulting from the handling or preparation of food, any solid or liquid matter normally generated by a family in a residence in the course of day-to-day living, used oil, metals, surplus items, chemicals, and drums.

- This does not constitute an all-inclusive list or summary of all acceptable Collection Vehicle waste items.

## **What are the vehicle requirements?**

Collection and Transport vehicles must be clean, easily cleanable, and in good repair.

- Collection and transport vehicles must be designed and constructed to prevent littering or discharge.
- The business name and phone number of the Waste Hauler Operation owning the Collection Vehicle must be affixed on the vehicle in letters and numbers that are a minimum of eight (8) inches in height.
  - Waste Tire transport vehicles must comply with the requirements of R315-320-4(2).
  - Infectious Waste Hauler requirements – see the Infectious Waste FAQ.
- The Department issued permits must be affixed to each permitted collection or transport vehicle.

**Do Loads need to be covered?**

A heavy duty canvas or other acceptable heavy duty cover that is adequate in size to cover the open body of the vehicle must accompany the vehicle if required.

**What are the permit requirements and limitations?**

Permits must be displayed visibly on the Collection Vehicle at all times. Permits are non-transferable. Collection and Transport Vehicle permits are two stickers that shall be placed on the vehicle as having been permitted for the current year. Waste Hauler Operations must not create a nuisance or hazard to health. All unsalvageable wastes must be transported to and disposed of in sites approved by the Department.

Putrescible materials must be stored in containers with tight-fitting lids so as to make the containers fly and vermin proof. Containers must be constructed of painted metal, durable plastic, or rubber.

If discharge occurs during collection or transportation, the material shall be picked up immediately and returned to the vehicle and the area must be properly cleaned of any Waste residue. Waste Hauler Operations may not collect any Waste materials that are unauthorized or that are smoldering, smoking, or burning.
